PROFILE

Senior AI Engineer building **AI agent** and **automation** products for enterprise clients with **1M+ customers**. Full-stack across **FastAPI, React and Next.js**, with hands-on experience in **RAG**, LLM agents and DSA problem solving.

PROFESSIONAL EXPERIENCE

Senior AI Engineer, *Servurance Technology (DiscvrAI)* 02/2026 – Present

- Build **AI agent-based applications** for large enterprise clients with **1M+ customers**, taking products from requirements to production deployment.
- Delivered end-to-end **AI automation** platforms for **AP (accounts payable) automation**, **bank surveillance**, **insurance claims** processing and the **procurement lifecycle**.
- Designed **RAG pipelines** and multi-step **AI agents** that read documents, extract data, validate it against business rules and route decisions, with human-in-the-loop review.
- Cut client business workflow time by **~60%** by replacing manual review steps with AI automation, making operations **faster, cheaper and more accurate**.
- Build backends in **Python + FastAPI** and frontends in **React and Next.js**, on **PostgreSQL, MongoDB and Redis**; automated workflows on **n8n**.

EDUCATION

Bachelor of Technology in Computer Science & Engineering, 10/2020 – 09/2024
Kalinga Institute of Industrial Technology (CGPA - 8.35) Bhubaneswar

Software Development, *Masai School* 10/2024 – 02/2026

SKILLS

Languages — Python, JavaScript, TypeScript, SQL, HTML, CSS
Frameworks & Libraries — FastAPI, React, Next.js, Node.js, Express.js, Tailwind CSS
AI / GenAI — AI Agents, RAG, LLMs (Gemini, OpenAI), Function / Tool Calling, Prompt Engineering, Vector Search
Databases — PostgreSQL, MongoDB, Redis, Firebase
Tools — Git, GitHub, Postman, n8n, Vercel, REST APIs
Core — Data Structures & Algorithms, OOP, DBMS
Soft Skills — Ownership, Adaptability, Client Communication

PROJECTS

ParkSmart – Smart Parking System (React, Firebase, Gemini, Vercel) | Live Demo | GitHub

- Built a parking discovery and pre-booking platform covering **230+ parking spaces** around popular places in **10 Indian cities**, with location search, interactive map, filters and live availability.
- Built **Parky**, an **LLM-powered AI agent** (function calling) that understands plain-English requests (place, dates, vehicle), opens matching results, pre-fills bookings and answers user queries.
- Implemented the booking lifecycle with daily-capped and peak-hour pricing, cancellations and a referral program; secured the LLM key behind an authenticated **serverless API**.

OneShop E-Commerce Platform (MERN, TypeScript, Stripe) | Live Demo | GitHub

- Built a full-stack e-commerce app using the **MERN** stack with **TypeScript**, JWT auth, role-based authorization, product catalog with category filtering and search.
- Added an **AI shopping agent** and **support chatbot** that help users find products and track orders.
- Integrated the **Stripe** payment gateway with cart management and order tracking.

ACHIEVEMENTS

LeetCode: **1715** peak contest rating, **700+** problems solved (**top 0.3%** of users)
